

Signature Series® DRINKING WATER STATION TRAILER

The Signature Series® Sustainable Hydration Anywhere You Need It

When water access is not optional and bottled water is not practical, the Signature Series® Water Station steps in. Built for mobility, durability and fast setup, the Signature Series® delivers clean, cold, filtered drinking water without the waste, ongoing cost, or logistics tied to bottled water.

From construction projects and disaster response operations to festivals, infrastructure projects, public works deployments, and remote locations, the Signature Series® is engineered to travel where permanent water infrastructure doesn't exist.

Top Uses for The Signature Series® Water Station Trailer:

-  Construction & Remote Job Sites, Outdoor Labor Operations, Agriculture
-  Outdoor Events & Festivals, Municipal & Public Works
-  Emergency & Disaster Response, Military & Field Ops

What is a Drinking Water Station Exactly?

- 4 push-back fill stations with adjustable nozzles
- 300-gallon onboard water capacity, enough for about 2,400 standard 16 oz bottles
- Multi-stage refillration for clean, safe drinking water
- Built-in electric chillers for sweater-resistant walls
